**BIWIN**™

BIWIN Mini SSD Reader
User Guide

❶ Removing the Tray

Locate the Tray: Find the tray-eject tool included in the package. Locate the tray on the side of the Mini SSD reader.
Eject the Tray: Insert the tray-eject tool into the hole beside the tray. Push in slightly until the tray pops out automatically.
Remove the Tray: Once the tray is partially released, carefully pull it out with your fingers.
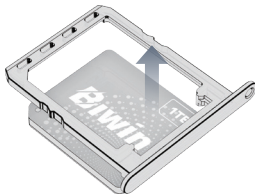

❷ Installing the Mini SSD

Check the Orientation: Ensure that the Mini SSD logo faces upward before installation.
Insert the Mini SSD: Gently push the Mini SSD upward into the tray until it is seated firmly in place.
Note:
• Make sure the Mini SSD is inserted in the correct orientation.
• Apply gentle pressure and do not force it.
• If resistance is felt, remove the Mini SSD and check the direction before inserting.

❸ Inserting the Tray into the Reader

Align the Tray: Align the tray with the reader slot.

Insert the Tray: Keep the tray level and push it in smoothly until it is flush with the casing and does not protrude.
